

Effective Transportation via Outsourced Third Party

Transervice Logistics Inc. assumed the responsibility of delivering Durobag products to its end users in the New York Tri-State Area through its dedicated fleet in May 2002. David McAleer, **Transervice's** Transportation Manager, was assigned the operational tasks of overseeing the equipment and five Teamster road and yard drivers at Durobag's New Jersey location.

Transervice's management style at Durobag has over the past 7 years proven to be very effective, resulting in increased driver reliability and productivity, as well as, achieving excellent DOT safety ratings. Economic gains were obtained by converting the once hourly paid drivers to an incentive based paid program and by creating a solid working relationship with the Teamsters Union and the local Durobag Management team.

Transervice Logistics Inc. is a 40-year Veteran of Dedicated Fleet Services throughout North America, offering integrated, yet customized Dedicated Carriage, Full-Service Leasing and Contract Maintenance programs. Known for its Full Disclosure, Guaranteed Maximum Rate, Gain Sharing and Zero Equipment Mark-Up options, **Transervice's** 1200 employees operate from some 175 dedicated locations, while handling over 29,000 pieces of equipment on behalf of its Fortune 1000 clientele.
