

Supplier Capabilities Spotlight

Transervice Logistics Inc.

Captive Shop Model Leads To Success
Taking over shop operations and offering customized solutions make Transervice one-of-a-kind.

Transervice has perfected a formula for long-term client partnerships. It began 50 years ago with supporting “one to one relationships” and continues until this day.

Transervice provides dedicated on-site maintenance and logistics services. “This means that our clients will have the same technicians working on their vehicles every day. Over 1,150 of the 1,200 Transervice employees work at our customers’ locations,” according to Wolfgang Marschhauser, Senior Vice President.

“Since 1969, our business has grown extensively in the food, dairy and beverage marketplace. It’s an area that requires comprehensive maintenance services due to the nature of the product – if a refrigeration unit goes down, the

product is at risk. When you have the same technicians dedicated to a client, they get to know the equipment and even more importantly develop relationships with the drivers,” he says.

Transervice has been providing its services, maintenance, leasing and logistics, to the dairy industry for many years including distribution of Kroger dairy products to its stores, fleet maintenance for Beyer Farms, Elmhurst Dairy, Guida Dairy and Cream-O-Land Dairy at 2 locations in New Jersey.

Whether it is helping to optimize fleets, maintaining rolling stock and MHE, leasing equipment or providing drivers, Transervice has been dedicated to creating specialized programs to ensure the success of its customers in the food, dairy, beverage, manufacturing and distribution industries.

Transervice’s unique operating model caters to clients with demanding needs and customers.
